

Runway 33R ILS Flight Inspection – May 15, 2009

Date of Release: May 14, 2009

Nav Canada will be completing an Instrument Landing System inspection on Runway 33R from 11:00 a.m. to 1:00 p.m. on May 15, 2009. A white and blue regional jet will make repeated approaches to the runway at low altitude without the landing gear down approximately every 5 to 10 minutes.

These unusual aircraft manoeuvres are normal operations required for Instrument Landing System inspections. Daily weather and air traffic conditions may require adjustments to the actual times of the flight inspection.
