

**Runway 05 ILS Flight Inspection – April 18, 2009**

Date of Release: April 17, 2009

Nav Canada will be completing an Instrument Landing System inspection on Runway 05 from 9:00 a.m. to 11:00 a.m. on April 18, 2009. A white and blue regional jet will make repeated approaches to the runway at low altitude without the landing gear down approximately every five to ten minutes.

These unusual aircraft manoeuvres are normal operations required for Instrument Landing System inspections. Daily weather and air traffic conditions may require adjustments to the actual times of the flight inspection.
