

# ARFF Vehicle Service Test

## ARFF Vehicle Service Test

**Pre-requisites:** Not Applicable

### **Description**

The GTAA Training Division is pleased to offer our ARFF Vehicle Service Test course. This 8 hour program will cover all aspects of the annual Service Test required by the Canadian Aviation Regulation standard 323. All testing is conducted I.A.W. Standard 412 of the National Fire Protection Association (NFPA).

The course is offered in both official languages, and is outlined as follows;

Instruction on ARFF Vehicle Service Testing, presented by certified Fire Service Instructors will include:

- a. Requirements for testing
- b. Service test components
- c. Performance Criteria
- d. Conduct Pre-test Pump delivery
- e. Test methods and calculations
- f. Pressurized agent purging and venting
- g. Acceleration test
- h. Brake operation test

### **Goals:**

Upon successful completion of the training each trainee will have the knowledge required to perform an annual service test on any ARFF Vehicles as required by C.A.R.S regulations. [Course Policies](#)

**Cost:** Please refer to [Fee Schedule](#)

**Duration:** 16 Hrs

**Class Size:** 10
