

# Command and Control

## Command and Control

**Prerequisites:** NFPA 1001 or Equivalent

### **Description**

The GTAA Fire and Emergency Services Training Institute is pleased to offer our Fire Ground Command Operations course. This 16-hour course will cover all aspects of Command and Control

The course will include the following;

- Introduction to Command
- Command Procedures
- Sectoring and standard company functions
- Communications
- Staging and fire apparatus placement
- Rescue size-up procedures
- Fire control
- Strategy factor
- Property conservation
- Incident command safety practices
- Haz-Mat emergency response command procedures

### **Goal:**

The course is designed for firefighting personnel with limited knowledge of Command Control. It will aid the individual who may be placed in a command role giving him / her tools to command an incident. [Course Policies](#)

**Cost:** Please refer to [Fee Schedule](#)

**Duration:** 16Hrs

**Class Size:** 12
