

Confined Space Entry

Confined Space Entry

Pre-requisites: It is recommended that participants complete a Self Contained Breathing Apparatus Program prior to attending this course. (This is not mandatory but suggested)

Description:

Confined Space Training offered by Greater Toronto Airports Authority Fire and Emergency Services Training Institute provides participants with the knowledge and skills to be able to work safely in a confined space environment. The Course focuses on the Canada Labour code, Occupational Health and Safety Act, Air monitoring, Personal Protective Equipment, Simulated classroom scenarios and live entries on the second day using all previously aquired skills.

Goal:

This Program ensures each student is given the required information and tools to be able to enter confined spaces with confidence and safety. [Course Policies](#)

Cost: Please refer to [Fee Schedule](#)

Duration: 16 hours

Class size: 16 participants Max
