

# Emergency Patient Care (First Responder)

## Pre-requisites:

**CPR – Level C, AED, Standard First Aid.** This program meets or exceeds the standards from the Ontario Fire Marshall's Office and is supported & endorsed by Medcontrol Consultants Inc.

## Description:

This course covers and reviews the emergency medical system and the specific roles of the emergency response teams from first responders to EMS Paramedics to emergency room patient delivery. Content will cover common medical and trauma emergencies and the related patient care and management. Emphasis will specifically focus on first responder and firefighter emergency patient care and their roles and responsibilities associated with the EMS system. Course curriculum will focus on pre-hospital care, patient assessment and medical/trauma emergencies including respiratory cardiac, neurological, musculoskeletal, spinal and abdominal emergencies as well as emergency child birth and special considerations towards pediatric, geriatric and psychological situations. Medical Oversight included. Scheduled on demand. Brady 10th Edition Emergency Care workbook, textbook available at FESTI Bookstore.

## Goal:

To prepare those personnel who participate in or wish to participate in medical response such as Fire, medical or Industry. [Course Policies](#)
