

Self Contained Breathing Apparatus

Self Contained Breathing Apparatus

Description:

The Self Contained Breathing Apparatus Course was developed for those individuals who may require added respiratory protection in their line of work. It has been recognized for years the potential respiratory hazards that can be found in confined spaces, Freon, chlorine or other dangerous chemical storage areas. These chemicals have and will continue to pose a hazard to employees who must work in and around them. This course focuses on the proper care and maintenance as well as proper donning and use of the SCBA

Goal:

It is hoped that this course will instill enough confidence in students so that when faced with a situation where an SCBA will be required they will be able to do so with confidence and safety. [Course Policies](#)

Cost: Please refer to [Fee Schedule](#)

Duration: 8 hrs
